A ROBUST AND MULTIPURPOSE HOOD

The rear hood is adjustable. Adjust it to the minimum for shredding slightly dense vegetation or maximum product recycling. Adjust it to the maximum when shredding dense vegetation or if you want to work faster, while limiting the power input.

ROLLER WITH REMOVABLE ENDS

Roller of 220 mm with removable ends and mud scraper. Seal to protect the life-greased bearings.

SHREDDING KNIVES

The knives has a self-cleaning and exchangeable design. It ensures uniform shredding of all of the material. Long material is fed through the rotor in a second step in the crop flow, whereas material that is already shredded passes through. The result is a homogeneous mulch.

DOUBLE METAL FRAME

The cutting chamber on features a double-skinned construction (5 + 5 mm). The toothed counter blades allow the machine to mulch even the more voluminous residues and thicker branches into fine pieces. The body is reinforced with the addition of a sheet metal internal housing for extra strength.
