TRANSMISSION BELT

The 3 drive belts can be tensioned simply and easily by means of a practical external screw system. All implements are fitted with toothed belts that, unlike plain belts, prove more effective and offer greater performance.

A ROBUST AND MULTIPURPOSE HOOD

The rear hood is adjustable. Adjust it to the minimum for shredding slightly dense vegetation or maximum product recycling. Adjust it to the maximum when shredding dense vegetation or if you want to work faster, while limiting the power input.

DOUBLE METAL FRAME

The cutting chamber on features a double-skinned construction (4 + 4 mm). The toothed counter blades allow the machine to mulch even the more voluminous residues and thicker branches into fine pieces. The body is reinforced with the addition of a sheet metal internal housing for extra strength.
